

PROCEEDINGS OF THE

Canadian Society for the History  
and Philosophy of Mathematics

Société Canadienne d'Histoire  
et Philosophie des Mathématiques

Volume 10

*Twenty-Third Annual Meeting*

Memorial University  
St. John's, Newfoundland  
June 7-8, 1997

*Edited by*

J.J. Tattersall  
Providence College  
Providence, Rhode Island

Proceedings of the CSHPM/SCHPM 23rd Annual Meeting  
Memorial University  
June 7-8, 1997

Table of Contents

Preface

Special Session/Session Spéciale  
Science and Mathematics

Rudiger Theile (University of Leipzig) Leonard Euler (1707-1783): Episodes from his Life and Work . . . . .	1
Rebecca Adams (Southern California College) Mathematics and Phyllotaxis . . . . .	27
Erwin Kreyszig (Carleton University) Basic Ideas in Modern Numerical Analysis and Their Origins . . . . .	34
Sharon Kunoff (Long Island University) Advances in the Study of the Three Body Problem . . . . .	46
Michael Pool (University of Western Ontario) Mathematical Knowledge in the Regulae . . . . .	51

Regular Session/Session Ordinaire  
Contributed Papers

Fran Abeles (Kean University) <i>Some Mathematical Letters of Charles Dodgson, 1866-1867</i> . . . . .	60
Amy Ackerberg-Hastings (Iowa State University) <i>How Straight Must a Straight Line Be to Be Straight? The Teaching of Euclidean Geometry in the Early Republican United States</i> . . . . .	68
William S. Anglin (University of Toronto) <i>The History of the Bachet Equation: From Diophantus to Baker</i> . . . . .	78
Edward Cohen (University of Ottawa) <i>A Short History of Gregorian Calendar Reform</i> . . . . .	102
Aditi Gowri (University of Texas at Austin) <i>Mathematical Revitalizations</i> . . . . .	117
Roger Godard (Royal Military College of Canada) <i>History of the Least Squares Method and Its Links with Linear Algebra</i> . . . . .	133
Peter L. Griffiths (Independent Scholar) <i>The Mathematics of the Projection Maps of Ezlaub (1511) and Mercator (1569) including Comments from Edward Wright (1599)</i> . . . . .	148
Jacques Lefebvre (Université du Québec à Montréal) <i>The Importance and Ambiguity of Mathematics in the Works of Robert Musil</i> . . . . .	159
