Foreword

This volume contains some of the papers delivered at the Fourteenth Annual Meeting of the Canadian Society for the History and Philosophy of Mathematics, held at the University of Windsor in Windsor, Ontario from May 28 - May 30 of 1988. It is the first time in its history that the Society has done this, and we hope that the publication of *Proceedings* will become a regular part of the Society's activities. Since the idea of doing this occurred to us only after the meeting it proved not possible for all who gave papers to prepare versions in a form suitable for reprinting here. To all of those who were able to do so our thanks for your efforts to comply with our requests for formatting. To the others we hope that the foreknowledge that the *Proceedings* will also be published this year will enable you to prepare versions for inclusion in the 1989 edition.

We hope all members of the CSHPM will enjoy reading the talks represented here, and especially that those who were not able to be at the 1988 Annual Meeting will find these papers a stimulus to attend the 1989 meeting.

Tasoula Berggren,
Editor of *The Proceedings*
